## REACH - Supplier's declaration

## Dear Sir or Madam,

The REACH regulation obliges suppliers of articles to inform about substances of very high concern (SVHC) in their articles according to the regulation (EC) 1907/2006 (REACH).

Article 33(1) REACH states that suppliers of articles must inform the recipients of these articles about SVHC contained in a concentration of more than 0.1% by mass (w/w).

All substances identified as SVHC are listed in the so-called candidate list (see website of the European Chemicals Agency (ECHA): <a href="www.echa.europa.eu/candidate-list-table">www.echa.europa.eu/candidate-list-table</a>) to which new substances are usually added twice a year. Suppliers should inform the customers of an article containing a newly identified SVHC above 0.1% (w/w) without delay as soon as the substance has been added to the candidate list.

We therefore kindly ask you to provide us with the information according to Article 33(1) REACH for each of the articles delivered to Anton Paar Group or to confirm the absence of SVHC in these articles.

We hereby confirm that the amount of restricted substances in the articles supplied by us does not exceed
the maximum concentration values according to REACH Regulation (EC) No. 1907/2006 of the current
SVHC Candidate List.

	The following products delivered to Anton Paar Group contain the respective SVHC substances above 0.1%
	w/w (if applicable):

Anton Paar Materialno.	Manufacturer Part number / Description	SVHC- Substance name	CAS-No.	Concentration [%] w/w	Additional information

## REACH – Supplier's declaration

In addition, we hereby declare that we regularly monitor the ECHA (SVHC) Candidate List, which is currently updated twice a year, and that we will automatically inform Anton Paar Group if a (sub)article delivered to Anton Paar Group contains SVHC substances in a concentration of more than 0.1 % w/w.

We hereby confirm the accuracy of the information provided above:
