Following the August 2023 acquisition of Brabender, the Brabender portfolio is now distributed and supported by Anton Paar. Developing high-end analytical instruments that empower users globally unites us. Two pioneers on one mission: Together we measure the world.

Brabender[®]
A brand of **Anton Paar**

Who is Brabender?

Brabender, founded in Duisburg, Germany, in 1923, is a leading global manufacturer of measurement and process engineering solutions for testing the quality of various raw materials as well as for the development and optimization of products, formulations, methods, and processes. As a renowned supplier of devices and equipment for testing a wide variety of material properties, Brabender stands for high quality and durable measuring and process technology. From laboratory equipment to small-scale production, Brabender devices are used in quality assurance as well as in research and development.

Brabender portfolio

- Brabender 3-Phase System for flour and dough analysis
- Torque rheometers and viscometers
- Extruders
- Moisture analyzers
- Density analyzer for rubber compounds
- Process viscosity sensor
- Mills
- And much more...
