

# Microwave Digestion at its Best

by Mr. Amrish Dave

1<sup>st</sup> November 2018 | 10:00 – 14:00 hours

Application Lab, Anton Paar India, Hyderabad

## About this seminar:

Join us in this seminar to see Microwave Digestion at its best with Multiwave 7000. Multiwave 7000 combines the well-known concept of Anton Paar's HPA-S with modern, well-engineered microwave technology, representing a new level of microwave digestion. We will further highlight relevant academic and industrial application examples with hands on session with the instrument.

## We will provide you technical insights into the following topics during this seminar:

Time	Details
10.30 – 11.00	Introduction to Microwave Acid Digestion
11.00 – 11.15	Introduction to Anton Paar's latest offering – Multiwave 7000: Microwave Digestion at its best!
11.15 – 11.30	Coffee Break
11.30 – 12.30	Multiwave 7000: Technology, Workflow and Application Examples
12.30 – 13.00	Hands on Session on Multiwave 7000
13.00 – 14.00	Lunch

## Speaker:

**Mr. Amrish Dave** is currently working as Head of Division for ASC & Raman Technologies for Anton Paar India. He has more than 22 years of experience handling scientific instruments from various fields like Chromatography, Mass Spectrometry, Polarimetry, Refractometry, Raman Technology, Microwave Assisted Synthesis and Sample Preparation instruments.

This event follows a 'seminar model' that includes a balance of theoretical sessions and practical, hands-on sessions with the instruments available.
