

Petro Days with Anton Paar

by Dr. Soren Draffehn and Dr. Robin Isyas
11th February, 2020 | 08:30 – 14:00 Hours
Al-Anoud Ball Room, 15th Floor, Grand Majestic Hotel, Murqab, Kuwait

About this workshop:

This workshop will show the extended application possibilities of Anton Paar instruments for the petroleum industry. With more than 140 solutions for the petroleum and related industries, you will learn about the latest solutions in measuring technology which comply with international standards for all stages of production.

Who should attend:

This workshop will prove useful to people who are working in the field of petroleum, its refineries, marketing terminals and testing laboratories or are already using Anton Paar instruments.

We will provide you technical insights into the following topics during this workshop:

- Experience Perfection from First Drop: Diana 700 - The new atmospheric distillation analyzer
- Flash It Up: Flammability testers from Anton Paar to cover wide range of applications
- Be Compliant with SVM Viscometer: ASTM D445 inside
- Digital density measurement redefined with Pulsed Excitation method
- PNR 12: The Versatility in Consistency
- Fuel oxidation and stability tests

Speaker:

Dr. Soren Draffehn has studied from Potsdam University from the Institute of Chemistry. He is highly respected researcher who has written many citable articles and papers for various research journals. He has been working in Anton Paar for many years and is Head of Product Management for ProveTec products.

Dr. Robin Isyas has completed his Ph.D in UV-Vis spectroscopy and for the past many years, he has been working in the field of Analytical Instrumentation. He is currently Sales Manager for Distribution Partners in South Asia, Middle-East, and Africa for Anton Paar.
