

MCR Rheometer User Course – Hands-on-training on RheoCompass™

by Dr. Ornov Maulik

21st October 2019 | 09.30 – 17.00 Hrs

About the course:

The training course covers MCR rheometer hardware and RheoCompass™ software as well as the fundamentals of rheology. Additionally, the course covers strategies and tips for making effective measurements with your MCR rheometer.

We will provide you technical insights into the following topics during this course:

- Proper care and maintenance for your MCR rheometer, accessories, and measuring systems
- Adjustment and calibration verification for your MCR rheometer
- Structure and basic operation of RheoCompass™ software
- Fundamentals of viscosity, flow properties, and viscoelastic behavior
- Data interpretation and analysis
- Making effective, reproducible, and meaningful measurements

Speaker:

Dr. Ornov Maulik is presently working as an Application Specialist at Anton Paar Middle East Technical Centre, Dubai, where he provides technical support for characterization

techniques like such as Rheology, Particle size measurement and Indentation.

With a Doctorate in metallurgical and material engineering, he has expertise in different material characterization techniques.
